### **What is ePCO ?**

The Electronic Preferential Certificate of Origin (ePCO) is a web-based Certificate of Origin application and approval system. It is an online document that certifies the country of origin of a particular product. The ePCO is intended solely to prove the origin of goods in order to satisfy Customs or trade requirements. It can be used also as supporting documents for the issuance of corresponding Certificate of Origin by another authorised party.

It provides other functions to users such as:

- Online application of Cost Analysis and Certificate of Origin forms
- Online approval by authorised party (i.e. Ministry of International Trade and Industry - MITI)
- Online enquiry of application status

The schemes available under ePCO:-

1. ASEAN Industrial Cooperation (AICO)
2. Common Effective Preferential Tariff (CEPT)
3. Free Trade Agreement (FTA)
4. Generalised System of Preferences (GSP)
5. TEXTILE

### **How can ePCO benefit me?**

1. Single access point – enables a single access to both ePermit and ePCO applications by signing-on only once to the ePermit system.
2. Reduced turnaround time – immediate transmission of Certificate of Origin in a secure electronic environment, resulting in faster goods turnaround time.
3. Real-time track and trace – the capability and feature to track and trace the application status for the Cost Analysis and Certificate of Origin.

### **How can I start using ePCO?**
